

To Whom It May Concern:

I have heard some bad news that the government is once again trying to get into my enjoyment of life in this great country of freedom. I've heard that the government is trying to ban XM Radio. I enjoy my XM Radio when I travel across the country to go sightseeing. When traveling across the mountains or across much of the country, it's hard to get a radio station that I would like to listen to or for that matter, any station at all. XM Radio provides me with all the stations and weather information that I need. I'm able to know that no matter where I travel, I will have quality satellite radio to listen to. I know what stations I like, I know how to find them and I know that they will always be there. I pay for these services, like cable TV and its no decision of the National Association of Broadcasters to dictate what I'm permitted to listen to. It is in the best interest of the FCC to REJECT the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve in this great country of freedom and choice of ours. Uphold our freedom in America!
